

ANNOUNCEMENT

31 July 2023

**ACTIVITIES REPORT FOR THE QUARTER ENDED 30 JUNE 2023
FOR
MC MINING LIMITED (MC Mining or the Company)
AND ITS SUBSIDIARY COMPANIES**

HIGHLIGHTS

Operations

- Health and safety remains a priority and we continue to make progress despite two lost-time injuries (LTIs) recorded during the quarter (FY2023 Q3: one LTI);
- Run-of-mine (ROM) coal production at the Uitkomst metallurgical and thermal coal mine (Uitkomst Colliery or Uitkomst) was 1% lower than the June 2022 quarter at 118,469 tonnes (t) (FY2022 Q4: 119,005t). Production was impacted by difficult geological conditions and regular electricity blackouts interrupting operations at the colliery;
 - Uitkomst recorded 53,489t of coal sales during the quarter (FY2022 Q4: 34,126t), comprising 51,036t (FY2022 Q4: 28,360t) of high-grade domestic coal sales and 2,453t (FY2022 Q4: 5,766t) of lower grade middlings coal;
 - Uitkomst had 50,491t (FY2022 Q4: 15,534t) of high-grade coal at the colliery and 4,872t (FY2022 Q4: 22,169t) at port at the end of the quarter;
- Updated Life of Mine (LOM) plan and Coal Reserve estimate for the fully-licensed and shovel-ready Makhado steelmaking hard coking coal (HCC) project (Makhado Project or Makhado), significantly increasing the LOM and improving the project's economics;
 - Compared to the 30 August 2022 announcement of pre-feasibility studies, Coal Reserves¹ increased 53%, saleable steelmaking HCC increased 64% and saleable thermal coal increased by 57%;

¹ As announced on 30 June 2023. The increased Coal Reserves in the East Pit have resulted in increased saleable tonnes. This was confirmed by the most recent drilling programme.

- The updated LOM plan resulted in a 25% higher annual mine production rate with a 21.2% yield of saleable steelmaking HCC and 17.6% yield of 5,500kcal thermal coal (previously 19.8% and 17.2% respectively), delivering improved project financial returns;
- Commencement of managed tender processes to select the outsourced mining, plant and laboratory operators, which are expected to be completed during Q3 CY2023;
- Steady progress during the quarter on critical early works activities; and
- Continued ramp-up of mining and processing at the outsourced Vele Aluwani Colliery (**Vele Colliery** or **Vele**) following the recommissioning of the mine in December 2022; the outsourced agent produced 48,092t (FY2022 Q4: nil t) of thermal coal during the quarter.

Corporate

- Benchmark API4 export thermal coal prices continued to decline, averaging US\$115/t in the quarter compared to US\$146/t in Q3 FY2023 and US\$273/t in H1 of FY2022. Steelmaking HCC prices remained elevated, with the index-price averaging US\$250/t for the quarter.
- Available cash and facilities of US\$8.8 million comprising cash of US\$7.5 million and facilities of US\$1.3 million at quarter-end (net cash balance of US\$14.1 million at 31 March 2023) and restricted cash of US\$0.02 million (US\$0.02 million at 31 March 2023).

Events post June 2023

- Extension of the repayment date for the R160 million loan (US\$8.9 million), plus interest thereon, by the Industrial Development Corporation of South Africa Limited (the **IDC**), to 30 September 2023. The IDC withdrew the conditional, undrawn R245 million (US\$13.6 million) loan facility, which had been available since July 2019, subject to completion of due diligence and credit approval. The change of the project scope resulting in Makhado's peak funding increasing to R1.8 billion, made this facility redundant.

Godfrey Gomwe, Managing Director & Chief Executive Officer, commented:

"MC Mining has made significant progress on the Makhado Project during the quarter. The completion of a five-year Makhado Implementation Plan was augmented by the substantial increase in Coal Reserves and mine life at much-improved annual production rates. This progress bodes well for moving

operations down the cost curve while aiming to take advantage of the favourable near-term steelmaking HCC coal prices.

The Makhado early works activities continued during the quarter with funding activities expected to be concluded in H2 CY2023. The managed tender processes to select the outsourced mining, plant and laboratory operators also commenced during the quarter. We are excited to have strong contenders to be our partners and these processes are expected to be completed during Q3 CY2023.

The Uitkomst colliery continues to be impacted by the increased incidents of electricity blackouts implemented by Eskom, the state power utility. Production at the colliery requires extended travel time to the underground mining areas and a revised shift system to increase mining time was implemented during June 2023. I am pleased to report that initial results of the new shift system recorded favourable improvements in daily ROM coal production. Uitkomst is assessing potential additional international and domestic customers to optimise prices for the colliery's premium product.

The ramp-up of operations at the outsourced Vele Colliery continued during the quarter and the contractor is expected to be at full production during H2 CY2023."

DETAILED QUARTERLY OPERATIONS REPORTS

Uitkomst Colliery – Utrecht Coalfields (84% owned)

One LTI was recorded during the quarter (FY2023 Q3: one LTI) and the mine has enhanced its focus on leading indicators to deliver improvements in safety with the goal of zero harm.

The Uitkomst Colliery generated 118,469t of ROM coal during the quarter (FY2022 Q4: 119,005t) with production adversely affected by challenging geological conditions and lower seam heights. The implementation of daily electricity blackouts by Eskom also impacted operations at the colliery. Uitkomst does have back-up diesel generators but these are only sufficient for underground mining operations and the switch from Eskom to internally generated power affects both underground and surface operations. The continued use of the generators for the underground mining activities and high cost of diesel is impacting mining costs. A revised underground operating shift system was

implemented at Uitkomst during June 2023. This is designed to increase mining time, yielding additional ROM coal production leading to improved volumes of saleable coal.

Uitkomst sold 51,036t (FY2022 Q4: 28,360t) of high-grade pea and duff-sized coal during the three months to domestic customers. Due to the low API4 export prices, no coal was exported (FY2022 Q4: nil t). The average API4 coal price during the quarter was US\$115/t, 64% lower than FY2022 Q4 (US\$315/t). Uitkomst sold 2,453t (FY2022 Q4: 5,766t) of high ash, lower value middlings coal under fixed price arrangements. The colliery had 4,872t (FY2022 Q4: 22,169t) of high-grade coal at port and 50,491t (FY2022 Q4: 15,534t) on site at the end of the quarter. The export marketing agreement with Overlooked Collieries (Pty) Ltd expired at the end of June 2023 and the Company continues to assess potential domestic and international customers.

The weaker ZAR:US\$ exchange rate and higher coal sales volumes contributed to a 17% decline in production costs per saleable tonne (FY2023 Q4: US\$90/t vs. FY2022 Q4: US\$108/t). The ZAR denominated production costs continued to experience inflationary pressures as well as higher energy costs due to the increased diesel consumption to maintain underground operations during blackout periods. Processing costs were higher due to increased overtime and operating inefficiencies caused by the power outages.

	Quarter to end-Jun 2023	Quarter to end-Jun 2022	%▲

Makhado Hard Coking Coal Project – Soutpansberg Coalfield (67% owned)

The development of the Company's flagship fully licensed and shovel-ready Makhado Project is expected to position MC Mining as South Africa's pre-eminent steelmaking HCC producer. Makhado recorded no LTIs (FY2023 Q3: nil) during the quarter.

Implementation Plan

The Company continued to make steady progress and during April 2023 announced the Makhado Project Implementation Plan. A primary goal of the Implementation Plan was to improve the accuracy of the August 2022 pre-feasibility studies from $\pm 30\%$ accuracy to an estimated accuracy of $\pm 10\%$. In addition, the Implementation Plan included a detailed execution plan for the construction of the East Pit, Makhado coal handling and processing plant (**CHPP**) and related infrastructure and a detailed mine plan for the first five years of operations.

Updated LOM Plan and Coal Reserve

Subsequent to the Implementation Plan, MC Mining prepared an updated LOM plan and Coal Reserve estimate for the Makhado steelmaking HCC Project. The LOM plan builds on the five-year Implementation Plan and incorporates the exploitation of all portions of the East, Central and West Pit coal deposits that are mineable by surface mining methods. The updated Coal Reserve estimate was derived from the updated LOM plan using updated costs, macroeconomic and coal price assumptions.

The updated LOM plan extended the Makhado LOM from 22 years to 28 years (27% increase), despite the 25% higher annual ROM coal production rate and improved production metrics, as demonstrated below:

- 25% increase in the targeted mining rate from 3.2 to 4.0 million tonnes per annum (**Mtpa**) of ROM coal;
- 100% increase in CHPP capacity, from 2.0 to 4.0 Mtpa;
- 30% increase in planned annual sales of 64 Mid Volatile (Vol) steelmaking HCC to 0.81 Mtpa;
- 15% increase in planned annual sales of 5,500 kcal thermal coal to 0.62 Mtpa;
- 60% increase of total saleable coal products from 26 to 41 million tonnes over the mine life;
- time to first production increasing from 12 to 18 months due to the construction of the new CHPP whilst keeping the payback period materially unchanged at 3.5 years from the start of construction; and
- 11% increase in the estimated project peak funding requirements to US\$100 million (ZAR1.8 billion).

Engineering and operational tenders

Erudite (Pty) Ltd (**Erudite**) completed the detailed designs for the Makhado mine infrastructure and CHPP during the quarter. Erudite also commenced obtaining detailed execution quotes for the construction of the CHPP. This process is expected to be finished in Q3 CY2023 and will also cater for the enlarged mining and processing footprint. The Makhado Project will be contractor-operated and during the quarter the Company commenced managed tender processes to select a mining contractor, CHPP operating contractor and the analytical laboratory operator. These processes are expected to be completed in Q3 CY2023. First coal production is expected 18 months from commencement of construction, which is expected during H2 CY2023.

Early works

The Company continued to progress the critical Makhado early works during the quarter, including:

- commencement with detailed design, procurement and construction of the power supply overhead transmission line, with construction team mobilised onsite - a critical path activity;
- refurbishment of onsite accommodation to house project construction crews;
- placement of orders for key long-lead time items, including the payment of a deposit of ZAR19.0 million (US\$1.0 million);

- mobilisation of contractors for the construction of the main access road, main bridge and civil works for bulk water reticulation; and
- progress with erection of fencing to secure the project site.

Makhado Project Funding

The Company continued the Makhado Project composite funding initiatives during the quarter and anticipates that the funding will be concluded in H2 CY2023. The various initiatives underway include amongst others, build, own, operate, transfer (**BOOT**) funding arrangements, additional senior debt as well as debt/equity instruments and coal prepayments. During the quarter, the Company signed a Memorandum of Agreement (**MOA**) with Enprotec (Pty) Ltd (**Enprotec**) to design and procure the flotation and filtration plant, a key part of the CHPP required to extract the steelmaking HCC. The flotation and filtration plant is expected to cost ZAR155 million (US\$8.6 million) and in terms of the MOA, a significant portion of this plant will be constructed on a BOOT basis.

Vele Aluwani Semi-Soft Coking and Thermal Coal Colliery – Limpopo (Tuli) Coalfield (100% owned)

Vele recorded one LTI (FY2023 Q3: nil) during the quarter and a safety awareness campaign was launched at the colliery during the period.

The mining and processing operations at the opencast Vele Colliery were outsourced to Hlalethembeni Outsourcing Services (Pty) Ltd (**HOS**) and recommissioned in late December 2022. The recommissioning of Vele adds a further cash generating unit to MC Mining's portfolio with limited financial or human capital contributions and by the end of the period, had created 333 permanent jobs. HOS is responsible for all mining and processing costs and the Company remains responsible for the colliery's regulatory compliance, rehabilitation guarantees, relationships with authorities and communities as well as the supply of electricity and water. The construction of the overhead electricity line was completed in April 2023 and connected to the national power grid in May 2023. As a result, the generator at the Vele CHPP will be used as a back-up source of power, with Eskom being the primary source of electricity at the colliery. This satisfies the Company's commitment with regards to electricity infrastructure.

HOS completed the de-watering of the Vele Colliery open cast pit during the period and produced 48,092t (FY2022 Q4: nil t) of thermal coal during the quarter. Ramp-up to full production is expected

to occur in H2 CY2023 with HOS targeting monthly production of 60,000t of saleable thermal coal from Vele.

Greater Soutpansberg Project (GSP) – Soutpansberg Coalfield (74% owned)

The Greater Soutpansberg Projects recorded no LTIs (FY2023 Q3: nil) during the quarter and no reportable activities occurred during the period.

Appendix 5B – Quarterly Cash Flow Report

The Company's cash balance as at 30 June 2023 was US\$7.5 million with available facilities of US\$1.3 million. The aggregate amount of payments to related parties and their associates, as disclosed as item 6.1 of the June 2023 quarter Appendix 5B was US\$107k, comprising executive and non-executive director remuneration.

Godfrey Gomwe

About MC Mining Limited:

MC Mining is an AIM/ASX/JSE-listed coal exploration, development and mining company operating in South Africa. MC Mining's key projects include the Uitkomst Colliery (metallurgical and thermal coal), Makhado Project (hard coking coal), Vele Colliery (semi-soft coking and thermal coal), and the Greater Soutpansberg Projects (coking and thermal coal).

All figures are denominated in United States dollars unless otherwise stated. Safety metrics are compared to the preceding quarter while financial and operational metrics are measured against the comparable period in the previous financial year. A copy of this report is available on the Company's website, www.mcmining.co.za.

Forward-looking statements

This Announcement, including information included or incorporated by reference in this Announcement, may contain "forward-looking statements" concerning MC Mining that are subject to risks and uncertainties. Generally, the words "will", "may", "should", "continue", "believes", "expects", "intends", "anticipates" or similar expressions identify forward-looking statements. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements. Many of these risks and uncertainties relate to factors that are beyond MC Mining's ability to control or estimate precisely, such as future market conditions, changes in regulatory environment and the behaviour of other market participants. MC Mining cannot give any assurance that such forward-looking statements will prove to have been correct. The reader is cautioned not to place undue reliance on these forward-looking statements. MC Mining assumes no obligation and does not undertake any obligation to update or revise publicly any of the forward-looking statements set out herein, whether as a result of new information, future events or otherwise, except to the extent legally required.
